Tipo J PVC aislado Mylar Cable de termopar apantallado / alambre (IEC)

El cable de compensación se asemeja a la característica termoeléctrica del termopar relevante en un rango limitado de temperatura ambiente, típicamente de 0 ° a 80 ° C. Dado que estos cables están hechos de materiales de bajo costo, se pueden lograr ahorros de costos en las instalaciones de la planta en comparación con el funcionamiento del verdadero cable de extensión del termopar.
