

Sensor de temperatura del aire / termistor interior

Labfacility are the UK's leading manufacturer of Temperature Sensors, Thermocouple Connectors and associated Temperature Instrumentation and stockings of Thermocouple Cables. The Company has been trading since 1971 and is ISO9001 accredited.

Termistor NTC 10K de 2 hilos en un sensor de temperatura interior de montaje en pared para la medicin de la temperatura ambiental (solo para uso en interiores).

Caractersticas principales:

Valor de resistencia: 10K ohmios

Tipo: termistor NTC (Coeficiente de Temperatura Negativo), lo que significa que su resistencia disminuye a medida que aumenta la temperatura.

Rango de temperatura: Capaz de medir con precisin temperaturas de -50 C a +70 C.

Cableado: configuracin de 2 hilos para una conectividad sencilla.

Aplicaciones:**Sistemas HVAC**

: Monitorea la temperatura del aire para regular los sistemas de calefaccin, ventilacin y aire acondicionado de manera eficiente.

Caractersticas tcnicas**Specifications**

Product Code	XE-9868-001
General Description	Wall mounting indoor temperature sensor for environmental temperature measurement
Sensor Type	For indoor use only
Thermistor	10K NTC Thermistor
BETA 25/85	3977K
Housing	Moulded case L85 x W85 x H30mm
Max. Temperature	+70°C
Min. Temperature	-50°C
Accuracy	+/- 0.2K (over 0-70°C)

LABFACILITY

TEMPERATURE & PROCESS TECHNOLOGY

Features #1	Vented construction
Features #2	Surface or standard electrical conduit mounting
Features #3	Cable entry slots underside of housing
